

# Plainview-Old Bethpage Central School District

Grade 6
Curriculum Overview
2020-21

Dear Parents and Guardians of Sixth Grade Students,

Welcome to the Plainview-Old Bethpage Central School District and the 2020-2021! Our theme for this year is "Lighting the Way Forward" which entails our steps in ensuring a well-lit pathway to a safe, nurturing, and meaningful learning environment.

Our middle school program is a balance among academic, social and emotional, and mindfulness teaching and learning. Our teachers, support staff, administrators, and parents work cooperatively to provide our students with exceptional instructional experiences with a focus on your child's well-being to optimize learning.

Throughout the year, we will provide you with relevant information about your child's school experience. This booklet provides an overview of our curricular offerings. Our goal, through the curriculum, is to stimulate a variety of interests in our students and to foster skills and habits of mind that will enable them to reach their fullest potential.

Our sixth grade students' day consists of the following: English language arts through reader and writers workshop and ELA/SS inquiries; mathematics, to extend understanding of base-ten notations, building fluency with addition and subtraction, using standard units of measure, and analyzing and classifying two dimensional shapes; social studies, with a focus on the Eastern Hemisphere; and STEAM education where students engage in activities which apply science, technology, engineering, the arts, and mathematics. Students enjoy instruction and participation in music, art, physical education. To further our sixth graders education, we also provide robust opportunities in library media science, health, Mandarin, and technology. In all subjects, active hands-on experiences are provided and children are encouraged to express themselves, make connections among subject areas, explore issues and problems, and work cooperatively with peers and adults in the pursuit of becoming lifelong learners.

By working collaboratively, we can ensure your child is equipped with the skills and competencies necessary for his/her success. Please take the time to read this information, share it with your child, and discuss the school year ahead. Making a connection with your child's teachers and communicating regularly throughout the year will be essential to our partnership with your family.

Together, we have an opportunity to make a difference in your child's future.

Sincerely,

Joanne F. Mannion

parce Harrien

Assistant Superintendent for Curriculum & Instruction

## Language Arts

#### PARENT INFORMATION

The major goal of our English Language Arts program continues to be the enjoyment and appreciation of reading and writing. Students are encouraged to read for pleasure and for information in a variety of genres such as fiction, non-fiction, poetry and drama. Reading and writing are mutually supportive of each other and, therefore, are integrated across the curriculum. Skills and strategies will assist the students in becoming independent, confident learners in the areas defined below. However, these skills and strategies are not isolated entities, but rather embedded in our Language Arts program.

We encourage parents to support their child's development by being involved in the learning process. A strong home-school partnership is essential for ensuring your child's academic success. For additional support, we've provided website links and contact information.

All students will be expected to meet the New York State Standards for English Language Arts. That means that students will:

- Read, write, listen and speak for information and understanding
- Read, write, listen and speak for literary response and expression
- Read, write, listen and speak for critical analysis and evaluation
- Read, write, listen and speak for social interaction

#### During the year the children will be exposed to the following skills:

#### READING

Enriching reading experiences are offered to children at each of the middle schools. Reading offers an opportunity to focus on effective reading strategies using a variety of genres and authors. Students will strive to develop literacy competencies in the area of reading in:

#### **Word Recognition**

Word recognition incorporates the use of phonics, syntactic (grammar cues), and semantic (meaning cues) to read unfamiliar words.

- Recognize at sight a large body of high-frequency words and specialized content vocabulary
- Use knowledge of a variety of decoding strategies to quickly, accurately, and automatically read unfamiliar words

#### Background Knowledge and Vocabulary Development

Background knowledge and vocabulary development allow for students to use their knowledge of words and concepts to communicate effectively and comprehend meaning.

- Acquire new vocabulary by connecting to prior knowledge, reading books, and other print sources
- Use word structure such as roots, prefixes, and suffixes to determine meaning
- Use self-monitoring strategies to identify specific words causing comprehension difficulties
- Determine the meaning of unfamiliar words by using context clues, dictionaries, and other print resources (including electronic resources)
- Use a thesaurus to identify synonyms and antonyms
- Recognize the types of language (e.g., jargon, colloquialisms, informal vocabulary, and email conventions) that are appropriate to social communication
- Acquire new vocabulary by engaging with a variety of texts written by a range of different authors

#### **Comprehension Strategies**

Comprehension is the process of making sense from reading text or constructing meaning while listening. Comprehension is assessed both orally and in writing.

- Read grade-level texts from a variety of genres and by different authors for different purposes
- Use thinking skills and self-monitoring strategies, such as rereading, adjusting rate of reading, attending to vocabulary, to interpret meaning of text
- Use a variety of strategies (e.g., summarizing, forming questions, visualizing, and making connections, making inferences, and drawing conclusions) to support understanding of texts read
- Use the R.A.F.T. strategy (restate, answer, for example, tie it up) to respond to writing prompts
- Decipher the language used often in multiple choice questions (e.g., best, most likely, and except)
- Note and describe aspects of the writer's craft (crafting a strong lead, incorporating voice, or crafting sentences of various lengths and different beginnings)
- Demonstrate comprehension of grade-level texts through a range of personal responses, such as writing, drama, and oral presentations
- Evaluate the validity and accuracy of information, ideas, themes, opinions, and experiences in text to
  - identify conflicting information
  - consider the background and qualifications of the writer
  - evaluate examples, details, or reasons used to support ideas
  - identify differing points of view in texts and presentations
  - identify cultural and ethnic values and their impact on content
  - identify multiple levels of meaning
- Use text features, such as table of contents, indexes, headings, captions, and titles to understand and interpret informational texts
- Evaluate information, ideas, opinions, and themes by identifying
  - a central idea and supporting details
  - precise and vague language
  - statements of fact, opinion, and exaggeration
  - missing or unclear information
  - information that is implied rather than stated
- Determine how the use and meaning of literary devices, such as point of view, symbolism, figurative language, flashback, and foreshadowing, convey the author's message or intent
- Identify poetic elements, such as repetition, rhythm, and rhyming patterns, in order to interpret poetry

#### Motivation to Read

Motivation to read for a wide range of purposes, including academic, work, or pleasure, is crucial to lifelong literacy.

- Show interest in reading and be familiar with a wide range of tests, topics, genres, and authors
- Read to collect and interpret data, facts, and ideas from multiple sources
- Engage in voluntary independent silent reading for extended periods of time
- Locate and use school and public library resources, with some direction, to acquire information

#### WRITING

#### Overview:

Our comprehensive writing curriculum includes units of study for each grade that align to the NYS Next Generation Standards. In every unit teachers model for students how to: read like writers, use a variety of writing strategies, and interact with mentor texts. Modeling, with sample language, is a foundational part of the mini-lessons. Teachers are strategically reading aloud, prompting personal connections, and encouraging students to discuss, listen and ask questions. Mentor texts are used as an inspiration for writing.

Every writing unit of study methodically and routinely guides students through each stage of the writing process.

ı	T	1 1		1	C L
ı	Immersion – reading	and anaivzing	mentor texts	iearning the	rearnings of the genre
ı	minimoronom reading	arra arrary zirry	5 111011001 001100,	icai iiiiig ciic	reacares or the genne

Generating Ideas – writing short entries in the writers notebook, some of these ideas will be published into stories

Selecting – choosing a central idea for a fiction story or choosing a central topic for a nonfiction piece

\*Collecting – researching an idea or topic and writing more information in the writers notebook

Drafting – organizing ideas and writing out the whole piece on separate paper

Revising – reworking the draft by adding literary features, working on sentence variety, and/or sensory details

Editing – correcting spelling, punctuation, capitalization, grammar and/or paragraphing

Publishing – planning and writing a final copy (could be typed, handwritten, a book, a poster, an essay, a speech, etc.)

Evaluation – using a standards based rubric to assess different qualities of writing, including: purpose/meaning, structure/organization, craft/style, and conventions

Reflection – students reflect on the skills learned during the unit and the stages of the writing process

# Grade 6 English Language Arts Pacing Overview 2019-20

	Reading	Writing
Sept/Oct	Fiction: A Deep Study of Character	Personal Narrative
Nov/Dec	Tapping the Power of Nonfiction	Information Essay
Jan/Feb	Investigating Topics with Research	Argument Essay

March	Writing about Reading	Writing about Reading
Mar/April	Social Issues Book Clubs	Literary Essay
May/June	Perspectives and Point of View in Poetry & Fiction	Poetry

#### LISTENING

Through listening, students will be exposed to a range of grade-level materials for pleasure and information. The development of listening skills enables students to develop language, expand vocabulary, and increase attention span. Students who are making adequate progress in speaking are able to:

- Listen attentively to books read aloud and for different purposes for a specified period of time
- Listen respectfully without interrupting to discussions, each other, and to guest speakers
- Listen to and follow multi-step oral directions
- Use note taking and graphic organizers to organize information and ideas recalled from information read aloud
- Form an opinion about the validity and accuracy of information, ideas, opinions, issues, themes, and experiences
- Recognize persuasive presentations and identify the techniques used to accomplish that purpose
- Recognize and use the perspectives of others, including teachers and peers, to analyze and evaluate presentations
- Recall and identify significant ideas and essential details
- Identify missing or unclear information and information that is implicit rather than stated
- Distinguish between fact and opinion
- Connect new information to prior knowledge or experience

#### **SPEAKING**

Through speaking activities, students will be exposed to a range of grade-level materials for pleasure and information. Development of speaking skills enables students to develop language, expand vocabulary, and increase attention span. Students who are making adequate progress in speaking are able to:

- Speak in response to the reading of a variety of texts and performances
- Use grade-level vocabulary and conventional grammar to communicate for different purposes
- Include details that are relevant to the audience
- Communicate ideas in an organized and coherent manner
- Vary formality of language according to the audience and purpose for communication
- Speak with expression, volume, pace, and gestures appropriate for the audience and purpose of communication
- Respectfully participate in and contribute to group discussions
- Use information and ideas from other subject areas and from personal experiences to form and express opinions and judgments
- Make presentations featuring appropriate notes, outlines, and visual aids
- Discuss the content of friendly notes, cards, and letters with a teacher or classmate, in order to get to know the writer and each other
- Share book reviews that **s**ummarize the plot, describe the motivation of characters, and explain the importance of setting
- Articulate a thesis statement and support it with details, examples, and reasons

#### PROGRESS MONITORING

Approximately 3 times per year, students participate in literacy benchmarking to determine reading levels/lexiles, areas of growth and/or areas in need of attention. Additionally, informal and performance assessments are embedded in daily instruction. Summative assessments are given at the end of each reading unit of study.

#### **NYS TESTING**

The New York State Department of Education requires all students in grades three through eight to take a test in English Language Arts (ELA). These tests are designed to measure students' understanding of written, oral, and literal text in keeping with the New York State Standards. As of the summer of 2010, the New York State Board of Regents has vastly raised their proficiency standards in a greater attempt to predict future college readiness. Obtained scores assist in planning student instruction and help identify the need for remediation. They are not, and should not be, viewed as an absolute measure of a child's abilities or potential.

Ms. Eileen Annino, English Language Arts Chair K-6, can be reached at (516) 434-3254 or via e-mail at <a href="mailto:eannino@pobschools.org">eannino@pobschools.org</a>

Mr. Jeffrey Yagaloff, English Language Arts Chair 7–12, can be reached by phone at (516) 434-3185 or via e-mail at <a href="mailto:jyagaloff@pobschools.org">jyagaloff@pobschools.org</a>

#### PARENT INFORMATION

Below are the specific **math content topics** based on the NYS Next Generation Learning Standards that your children will be studying in class during this school year. We listed **vocabulary terms** that we will be teaching your children. You are encouraged to review these terms with your children at home.

All students will be involved in classroom activities designed to help them develop strategies for **understanding math concepts** and **retaining basic math facts and skills**. All students need practice, over extended periods of time, to commit facts and skills to memory. We encourage parents to support their children's learning via the use of flash cards, card games, and web-based math games. Included in this handout are suggested links to the New York State Education Department to learn more about the Next Generation Standards.

A strong home-school partnership is essential for ensuring our students' academic success. **Thank you for your continued support!** 

#### **VOCABULARY**

- Common denominator, equivalent fractions, mixed numbers, reciprocals, unit fractions
- Composite number, prime number, divisor, dividend, factors, multiples
- Equation (has an equal sign), inequality (has < or >), expression (no =, <, or >), variables
- True/false number sentences
- Linear Expression, numerical expression
- Perfect Squares, perfect cubes
- Greatest common factor, least common multiple, multiplicative inverse, reciprocal
- Absolute value, magnitude, integer, negative/positive number, opposite, rational number
- Variable, exponent, substitution, inverse operation, evaluate, exponential notation (whole number exponents)
- Ratio, proportion
- Unit rates, percent, unit conversions
- Standard algorithm for division
- Distributive property
- Number lines
- Parts of an expression (sum, term, product, factor, quotient, coefficient)
- Area, perimeter, volume, decomposing shapes, net, surface area
- Estimate

#### **VOCABULARY** (Continued from previous page)

- Quadrant, axes, ordered pairs, coordinates, x-coordinate, y-coordinate, coordinate pair, coordinate plane, origin, x-axis, y-axis, ordered pair
- Line of symmetry, symmetry
- Altitude and base of a triangle, hexagon, parallelogram, quadrilateral, rectangle, square, trapezoid, pentagon, right rectangular prism, cube, surface of a prism
- Line perpendicular to a plane, parallel planes
- Mean, median, mode, range, variability, sampling, population, sample, qualitative data, quantitative data, biased, distribution, symmetric, center, spread, shape, measures of center, measure of variation (range), outlier (no formula)
- Dot plots, histograms, pictographs, bar graphs
- Probability, chance, likely, unlikely, relative frequency, simple event

#### **CURRICULUM OVERVIEW**

In Grade 6, instructional time should focus on five areas: (1) connecting ratio and rate to whole number multiplication and division and using concepts of ratio and rate to solve problems; (2) completing understanding of division of fractions and extending the notion of number to the system of rational numbers, which includes negative numbers; (3) writing, interpreting, and using expressions and equations; (4) deepening understanding of area, surface area and volume; and (5) developing understanding of simple probabilities and statistical thinking.

- 1. Through their learning in the *Ratios and Proportional Relationships* domain, students:
  - use reasoning about multiplication and division to solve ratio and rate problems about quantities;
  - connect understanding of multiplication and division with ratios and rates by viewing equivalent ratios and rates as deriving from, and extending, pairs of rows (or columns) in the multiplication table, and by analyzing simple drawings that indicate the relative size of quantities; and
  - expand the scope of problems for which they can use multiplication and division to solve problems, and they connect ratios and fractions.
- 2. Through their learning in the *Number System* domain, students:
  - use the meaning of fractions and relationships between multiplication and division to understand and explain why the procedures for dividing fractions make sense;
  - extend their previous understandings of number and the ordering of numbers to the full system of rational numbers, which includes negative rational numbers, particularly negative integers; and
  - reason about the order and absolute value of rational numbers and about the location of points on a coordinate plane.
- 3. Through their learning in the Expressions, Equations, and Inequalities domain, students:
  - write expressions and equations that correspond to given situations, using variables to represent an unknown and describe relationships between quantities;
  - understand that expressions in different forms can be equivalent, and use the properties of operations to rewrite and evaluate expressions in equivalent forms; and
  - use properties of operations and the idea of maintaining the equality of both sides of an equation to solve simple one-step equations.
- 4. Through their learning in the **Geometry** domain, students:
  - find areas of polygons, surface areas of prisms, and use area models to understand perfect squares; and
  - extend formulas for the volume of a right rectangular prism to fractional side lengths and use volume models to understand perfect cubes.
- 5. Through their learning in the **Statistics and Probability** domain, students:
  - learn to describe and summarize numerical data sets, identifying clusters, peaks, gaps, and symmetry, considering the context in which the data were collected; and
  - understand the probability of a chance event and develop probability models for simple events.

#### MATHEMATICAL PRACTICES

- 1. Make sense of problems and persevere in solving them
- 2. Reason abstractly and quantitatively
- 3. Construct viable arguments and critique the reasoning of others
- 4. Model with mathematics
- 5. Use appropriate tools strategically
- 6. Attend to precision
- 7. Look for and make use of structure
- 8. Look for and express regularity in repeated reasoning

#### **REQUIRED KEY FLUENCIES**

Grade 5 Multi-digit multiplication
Grade 6 Multi-digit division

Multi-digit decimal operations

Grade 7 Solve px + q = r and p(x + q) = r

 $3.77 \times 2.8 = ?$  3.77 (2 decimal places)  $\times \quad 2.8 \quad \text{(1 decimal place)}$   $3016 \quad +754 \quad 10.556 \quad \text{(3 decimal places)}$ 

#### Note on Fluency with Procedures

Fluency with procedures (procedural fluency) means students are accurate, efficient, flexible, and know when and how to use them appropriately. Developing fluency requires understanding why and how a procedure works. Understanding makes learning procedures easier, less susceptible to common errors, less prone to forgetting, and easier to apply in new situations. Students also need opportunities to practice on a moderate number of carefully selected problems after they have established a strong conceptual foundation of the mathematical basis for the procedure.

#### **ASSESSMENTS**

The New York State Department of Education requires all students in grades 3-8 to take a test in mathematics. These tests will assess the content strands and the process strands in the NYS Revised Mathematics Learning Standards. Questions will be developed in accordance with increasing problem solving and higher cognitive demands. The New York State Assessment in Mathematics will be given in April. More information will be provided by your child's teacher.

Grade 6 students will be given district-wide quarter assessments throughout the school year to gauge each child's understanding with respect to the NYS Learning Standards, inform instruction, and alert teachers and administrators of the potential support needed within this school year and next school year.

Between the quarter assessments, student learning will be monitored through chapter assessments, which occur at the end of each chapter, as well as through formative assessments. Formative assessments are brief informal assessments such as exit tickets, journal entries, think-pair-shares, and one-on-one conversations between the teacher and student.

### Science - Grade 6

Science Standards. All students are well prepared for the new NYSSLS Grade 8 Intermediate Science Assessment.

#### What is our vision for science education?

The NGSS/NYSSLS reflect the latest research and advances in modern science. In order to equip students to think critically, analyze information, and solve complex problems, the standards are arranged such that—from elementary through high school—students have multiple opportunities to build on the knowledge and skills gained during each grade, by revisiting important concepts and expanding their understanding of connections across scientific domains.

The NGSS/NYSSLS enables teachers to offer all students interactive science instruction that promotes analysis and interpretation of data, critical thinking, problem solving, and connections across science disciplines—with a high set of expectations for achievement in grades 6-8.

The science standards complement English/ Language Arts and mathematics standards, enabling classroom instruction to reflect a clearer picture of the real world, where solving problems often requires skills and knowledge from multiple disciplines. Further, these standards are designed to provide an equitable, high-quality science education to all students.

Parents should understand that while some content might be similar to the past, it may look different from how they were taught.

In lieu of the traditional Science Fair project, the 6th graders work on a number of quarterly projects that incorporate research, planning and implementation of scientific concepts.

As the science standards are implemented in POB, they will enable students to:

- Develop a deeper understanding of science beyond memorizing facts
- Experience similar scientific and engineering practices as those used by professionals in the field.

Our 5th - 8th grade Science program follows the HMH Science Dimensions curriculum. In addition to a rich hands on experience, all students will be given a workbook as well as have on-line access to all resources.

The following topics are covered in the 6<sup>th</sup> grade:

- Engineering and Technology
- Forces, Motion and Fields
- Waves and Applications
- Energy and Energy Transfer

#### STEAM at POB

STEAM education is an interdisciplinary approach to learning where rigorous academic concepts are coupled with real-world lessons as students apply science, technology, engineering, the arts and mathematics in contexts that make connections between school, community, work, and the global enterprise enabling the development of STEAM literacy and with it the ability to compete in the new economy. (Tsupros, 2009)

Expect to hear more from your children about STEAM in their classrooms.

## **Social Studies – Grade 6**

The grade 6 social studies program emphasizes the interdependence of all people, keying in on the Eastern Hemisphere. A focus on a social science perspective emphasizes the interaction of geography and economics. The core disciplines of geography and economics are used to develop and draw relationships and understanding about socio-cultural, political and historic aspects of life in the Eastern Hemisphere. ELA and Social Studies are integrated. In this curriculum reading and writing are aligned to build enduring understandings and develop historical thinking skills about content area topics. As knowledge increases in the digital age, students need to develop and refine the ability to take a critical stance with regard to information. Through the use of inquiry students will be immersed in their learning, while building critical comprehension skills.

#### <u>History of Eastern Hemisphere Nations</u>:

- Time can be measured in years, decades, centuries and millennia
- Key turning points and events in the histories of Eastern Hemisphere nations can be organized into different historical time periods
- Different people may view the same event or issue from different perspectives
- The Neolithic Revolution was a technological development that radically changed the nature of human society
- Technological innovations have had both positive and negative effects on people, places and regions
- Civilizations and cultures of the Eastern Hemisphere (China, India, Greece and Rome) are explored through the arts and sciences, key documents and other important artifacts
- Religions and other belief systems have both united and divided the people of the Eastern Hemisphere
- The civilizations and cultures of the Eastern Hemisphere have contributed important ideas, beliefs and traditions to the history of humankind

#### Geography:

- The nations and regions of the Eastern Hemisphere can be studied using maps, globes, aerial and other photographs, satellite-produced images and models
- Civilizations developed where geographic conditions are most favorable
- Geographic features and climatic conditions in the Eastern Hemisphere influence land use
- The geographic diversity of the Eastern Hemisphere has significantly influenced physical mobility and the course of human development
- Over population and widespread poverty threaten the political stability of some nations in the Eastern Hemisphere

#### Economics:

- The ways resources are used impact the economic, political and historic aspects of life throughout the world
- Concepts such as scarcity, supply and demand, markets, opportunity costs, resources, productivity, economic growth and systems can be used to study the economies of various nations of the Eastern Hemisphere
- The economic systems of the world have become an interdependent network
- Nations have joined with one another in organizations which provide economic development and growth

#### Governments:

- Family, clan and tribal groups act to maintain law and order
- As settlement patterns changed, new forms of political order developed to meet the more complex needs of societies
- Present systems of government have their origins in the past
- Formalized governmental structures play a major role in maintaining social order and control
- Political boundaries change over time
- The extent to which human rights are protected becomes a key issue in totalitarian societies
- International organizations, such as the United Nations were created to prevent war and to fight hunger, disease and ignorance
- Citizens of the nations of the Eastern Hemisphere have rights and responsibilities as defined by their constitutions and by other laws of their nations.

# WORLD LANGUAGES - GRADE 6 MANDARIN CHINESE - FRENCH - SPANISH

Communication is at the very core of the human condition. In light of today's globalized world, and our evolving social landscape, being aware of, and sensitive to other cultures is more important than ever. At Plainview-Old Bethpage Central School District we feel that the study of world languages can help our students develop strong communication skills, develop 21st century skills, foster a love of learning, and develop a cultural awareness that will help them form strong bonds within their community and beyond.

Our world languages courses the grounded in World Readiness Standards for Learning Languages established by the American Council on Teaching of Foreign Languages (ACTFL). At its core are the 5 C's of language learning are: Communication, Culture, Connections, Comparison, and Communities. Each dimension weaving with the other form a fabric that helps guide our students to deeper learning and understanding.

Students in our middle schools are part of an active community of language learners! We continue our emphasis on developing communicative skills. Our classes provide

them with opportunities to put into practice their new language.

In Grade 6 our students continue their formal study of Chinese, French, or Spanish. They will meet every day for a quarter of the year. Topics of study include personal introductions, personal identification, calendar, time expressions, weather, school and classroom related vocabulary.

## CONTACT

Mr. Leonardo Rivera, World Languages Chairperson K–12, can be reached by phone at (516) 434-3179 or via email at «<u>LRivera@pobschools.org</u>».

# **Physical Education - 6th Grade**

The goal of physical education is to develop physically literate individuals who have the knowledge, skills and confidence to enjoy a lifetime of healthful physical activity.

Students will be engaged in various lessons that focus on teaching the skills and concepts of various physical activities. Physical Activities will be organized into 5 distinct areas Invasion Games (Soccer, Football, Basketball, etc...), Net/Wall Games (Tennis, Pickleball, volleyball, etc...), Target Games (curling, bowling, golf, etc...), Striking and Fielding Games (Baseball, Softball, Cricket, etc...) and Individual pursuits (Swimming, Yoga, Fitness, etc...)

Lessons will also emphasize sportsmanship, respect, cooperation, following directions/instructions, teamwork, and communication.

# **SHAPE America National Physical Education Standards**

**Standard 1:** The physically literate individual demonstrates competency in a variety of motor skills and movement patterns.

**Standard 2:** The physically literate individual applies knowledge of concepts, principles, strategies and tactics related to movement and performance.

**Standard 3:** The physically literate individual demonstrates the knowledge and skills to achieve and maintain a health-enhancing level of physical activity and fitness.

**Standard 4:** The physically literate individual exhibits responsible personal and social behavior that respects self and others.

**Standard 5:** The physically literate individual recognizes the value of physical activity for health, enjoyment, challenge, self-expression and/or social interaction.

# Music – Grade 6

#### **Classroom Music**

Through recommended activities such as singing, playing the recorder, moving, playing classroom instruments, reading music, creating and listening, students will study the following concepts:

#### Rhythm:

· Continue building on rhythm reading, writing, tempi, meter and conducting patterns

#### Melody:

- · Continue singing/playing/writing melodies in different modes and styles
- · Continue sight singing and solfege work

#### Harmony:

- · Perform accompaniments on barred instruments
- · Continue two and three part singing, canons, and singing/playing in harmony, simple chord progressions

#### Form:

· Continue to explore different forms, contrasting sections, form symbols

#### Timbre:

· Continue to experience singing and speaking voice, families of instruments, and instruments from different cultures

#### **Dynamics**:

· Continue to explore dynamics in playing, singing, creating, and listening to music

#### <u>Performing Ensembles – Band, Orchestra and Chorus:</u>

Instrumental students are encouraged to continue the band or orchestra instrument they played in 5<sup>th</sup> grade. Students who elect to participate in chorus can also participate in an instrumental ensemble (band or orchestra). The students in all ensembles continue to develop their individual musicianship and ensemble skills. The performing ensembles in the middle school are graded classes. Ensemble rehearsals take place either "0" period or period 9. In addition to the full ensemble rehearsals, there are group lessons scheduled on a rotating basis through the day. Parents play an important role in encouraging students to practice at home each day.

#### Performance ensemble concepts include:

· Proper technique, position, posture, grip, breathing, diction, etc.

#### Rhythm, articulation and phrasing

- · Sight reading
- · Tone production
- Dynamics
- Practice techniques
- · Rehearsal procedures/ensemble playing
- Instrument maintenance

Some holiday music may be included in concerts. For more information regarding concert selections, please contact your child's music teacher.

#### **MAPOB**

A district-wide organization dedicated to developing our student's musical skills in all the music disciplines: band, chorus and orchestra. We encourage parents, faculty, students and community members to join together to provide organized support for the music programs in the POB School District and community.

#### Please show your support! Dues are only \$10.00 per family!

#### MAPOB dues provide:

- · Scholarships for graduating seniors
- Instrument Zoo
- · Informational programs for district parents & students

Please "like" us on Facebook to find out about upcoming MAPOB events as well as updates on the different musical groups in our district!

## K-6 Visual Arts: Grade 6

The Plainview-Old Bethpage elementary art program is designed to reach all students and offer them a broad range of experiences and activities. While supporting the New York State Standards for the Arts, art instruction is based on the Basic Elements of Art and Principles of Design. Children are exposed to creative opportunities in various mediums and areas of self-expression, which are enriched further with art history and the works of accomplished artists. The art program is an integral part of the elementary interdisciplinary curriculum and plays a significant role in community activities as well.

#### Dr. Ben Wiley

Director of Art and Digital Instruction

The middle school art program builds on the strengths of the foundation established by the elementary art concepts and practices and bridges to the high expectations of the competitive high school art program. The following outline presents a general overview of each grade level experience and identifies some of the mediums and areas of emphasis. Projects, interpretations and outcomes vary from year to year and from class to class.

At each middle school, student's artwork is often displayed throughout the classroom, school hallways, and Art gallery spaces.

#### Students will be introduced to design elements and basic art vocabulary for:

- Line
- Shape
- Color
- Texture

- Space
- Patterns
- Movement/Rhythm
- Balance

## Contrast

Emphasis

#### Examples may include:

#### Drawing

- Observational
- Figure movement & Portrait

#### Painting

Secondary color mixing

#### 3-Dimensional work

- 3D Printed Design
- Puppets and literature
- Bottle people

#### Art History

- Multicultural influences
- Integration with social studies, science, and English

#### Possible mediums:

#### Paint

- Tempera
  - Brush techniques stippling, wet, dry

#### Watercolor

- Horizon line
- Foreground/Background

#### Pastels

- Blending
- Overlapping objects

#### Clav

- Slab method with texture and additions
- Paper

# **CHILD CARE PROGRAM**

Plainview-Old Bethpage Central School District offers child care for children in the middle schools in grades 5 - 8. The Child Care Program is located in both Plainview-Old Bethpage Middle School and Mattlin Middle School as long as there is sufficient registration. If there is insufficient registration in one middle school, the programs will be combined, and the students bussed to and from their home school.

Before-school care begins at 7:00 A.M. The afterschool program begins at the close of the day (8<sup>th</sup> period) coordinating with 9<sup>th</sup> period activities until 6:00 pm. The programs are contingent upon sufficient registration. Registration forms can be found on the district website under Parents and Community. The childcare office is located at the Stratford Road School Administrative Annex at 33 Bedford Road.

Registration for all programs is accepted throughout the year. For more information, contact Cheryl Dender at the Child Care office, 434-3124 between the hours of 4:00 pm and 6:30 pm during the school year.

#### **HEALTH SERVICES**

The Registered Nurse is a resource for the planning, coordination, and implementation of an effective program meeting all the requirements set forth in the New York State laws and the Commissioner's regulations. These include monitoring of physical examinations, immunizations, as well as vision, hearing and scoliosis screening. A cumulative health record is maintained for all students. Registered nurses are available for emergency care as well as consultation in all matters pertaining to the health and well-being of the students.

**Physical examinations are required by October 1**st for all new entrants, kindergartners, students entering 1st, 3rd, 5th 7th, 9th and 11th grade. Physicals are also required for any student participating in a sports activity.

All students are required to have Diptheria, Pertussis, Tetnus, Measles/Mumps/Rubella (MMR), Polio, Hepatitis B and Varicella vaccines as mandated by NYS law. All students entering school are required to have DTap – 4-5 doses (with one dose being given after the 4<sup>th</sup> birthday), Polio – 4 doses (with one dose being given after the 4<sup>th</sup> birthday), MMR – 2 doses, Hepatitis B – 3 doses, and Varicella – 2 doses. In addition, all students entering grade 6 must have a Tdap vaccine by their 11<sup>th</sup> birthday and at least one dose of Meningococcal conjugate vaccine (MenACWY) entering grades 7, with a 2<sup>nd</sup> dose after their 16<sup>th</sup> birthday. If a student has not had the required vaccines, they will be excluded from school as per the NYS guidelines.

\_Hearing and vision screening will be performed by the school nurse for any new entrant in grades K, 1, 3, 5, 7, 9 and 11 as well as any other time as it may be deemed necessary.

Due to the Pandemic there will be NO Vision, Hearing or Scoliosis screenings for the 2020 – 2021 school year.

If your child is to be excused from Physical Education for the day, a note is required. If a student visits a doctor and is to be medically excused from participating in class, a doctor's note is required with the length of time for excuse. A parent's note can be accepted for one day only after which a note from a physician is required.

If your child must take medication in school, please contact the school nurse. The school may not give your child any medication (including over-the-counter) internally and externally, unless there is a written direction by the family physician and parent. Students are **not** permitted to administer their own medication in school.

<u>Contact Information</u>: It is most important that the contact information form be returned to the school office. The individuals you choose for this responsibility should be able to come to school during the day to pick up your child if necessary.

Please update your contact information for Infinite Campus, with the school registrar 516-434-3045, as necessary.

## **EMERGENCY SCHOOL CLOSINGS / DELAYED OPENINGS**

In the event of inclement weather or emergency conditions, the Superintendent of Schools determines whether schools will be closed or there will be a delayed opening of schools.

If it is determined that the conditions will allow for the safe arrival of staff and students, the Superintendent may authorize a two hour delay in the start of the school day. This alternative to closing the schools permits greater flexibility in meeting the 180 day minimum session requirement for students set by the New York State Education Department.

A delayed opening schedule means that classes will start two hours later than normal and transportation will be provided two hours later than the normal pickup for all district and private schools.

#### **Delayed Starting Time**

Mattlin Middle School 10:40 am Plainview-Old Bethpage Middle School 10:40 am

In the event that schools are closed or delayed in opening because of inclement weather or other emergency, the following radio/TV stations will be notified and will make announcements, usually from 7:00 am-9:00am.

 WCBS 880AM
 WBAB 102.3FM
 WKJY 98.3FM
 WHLI 1100AM

 WALK 97.5FM
 WINS 1010AM
 WGBB 1240AM
 Cablevision Ch. 12

In addition, "School Messenger" will send a message to all families with active phone numbers in our system. Please make sure the school has your current telephone number in order for you to receive this call.

#### MISSION STATEMENT

The mission of the Plainview-Old Bethpage Central School District is to prepare civic-minded students to productively participate in a diverse and ever-changing world as self-directed, confident, curious, respectful and empathetic learners.
