

# WORKSHEET LESSON #3

Part I:  
Starting the  
Vehicle

The \_\_\_\_\_ controls the supply of power to the car's electrical system.

What 3 things must you do before starting the engine?

1. \_\_\_\_\_
2. \_\_\_\_\_
3. \_\_\_\_\_

When you hear the engine start, release the key right away or you could

\_\_\_\_\_

Once the engine has started:

1. \_\_\_\_\_
2. \_\_\_\_\_
3. \_\_\_\_\_

Keeping your grip at 9-3 or 8-4 position is appropriate for which situations?

Part II:  
Steering

\_\_\_\_\_

The two steering methods for turns are?

1. \_\_\_\_\_
2. \_\_\_\_\_

What are the advantages to push-pull steering?

\_\_\_\_\_  
\_\_\_\_\_

\_\_\_\_\_ controls the transmission.

Most cars will not start unless the transmission is in \_\_\_\_\_ or \_\_\_\_\_.

One use for the lower gears is to: \_\_\_\_\_.

The control that regulates speed is the \_\_\_\_\_.

Be sure that your foot is on the \_\_\_\_\_ before shifting to drive.

After shifting to drive:

1. \_\_\_\_\_
2. \_\_\_\_\_
3. \_\_\_\_\_

Part III:  
Stopping

The key to smooth stops is:  
\_\_\_\_\_.

Just before coming to a full stop, \_\_\_\_\_ to come to a smooth stop.

Once you have come to a full stop, always keep your foot on the brakes so that

1. \_\_\_\_\_
2. \_\_\_\_\_
3. \_\_\_\_\_

The main benefit of ABS brakes is:  
\_\_\_\_\_

ABS brakes \_\_\_\_\_ your stopping distance.

If your car has ABS brakes, use the \_\_\_\_\_ method.

Part IV:  
Backing

The only way to get a good view of the area behind the car is to:  
\_\_\_\_\_.

To back-up, place your left hand \_\_\_\_\_ and your right hand \_\_\_\_\_.

When backing, use the \_\_\_\_\_ pedal to control your speed.

When backing, the car will turn in the \_\_\_\_\_ direction as you turn the steering wheel.

Part V:  
Securing the Vehicle

After you stop and before you exit the car:

1. \_\_\_\_\_
2. \_\_\_\_\_
3. \_\_\_\_\_
4. \_\_\_\_\_
5. \_\_\_\_\_
6. \_\_\_\_\_
