# E-Cigarettes & Vape Pens Generations

## Cig-a-Like

E-cigarettes came onto the market around 2007.

Most delivered nicotine and were disposable.

## Variations

Variations on the first e-cigarettes included products like e-hookah and rechargeable versions.

## Vape Pens

These have batteries that can reach higher temperatures, have refillable e-liquid cartridges, and allow users to regulate the frequency of inhalations.

## Mods

Large size, modifiable e-cigarettes allow for more aerosol, nicotine, and other chemicals to be breathed into the lungs, at a faster rate.

## Pod-Based

These e-cigarettes are shaped like USBs and contain pods with higher amounts of nicotine than previous generations.
